Summary

Statistics graduate student skilled in probability, regression, and statistical modeling, with practical experience using R and SAS in academic projects and as a graduate teaching assistant. Actively seeking a Data or Analytics internship.

Education

University of North Florida (UNF), Jacksonville, FL

M.S. in Statistics (Ongoing)

Graduate Teaching Assistant

Relevant Coursework: Mathematical Statistics, Statistical Methods, Linear Models

University of North Florida

First semester

CGPA: 3.56/4.00

University of Dhaka, Bangladesh

B.S. in Statistics, 2024

CGPA: 3.42 / 4.00 (WES: 3.50)

Technical Skills

Programming & Tools: R, SAS, Latex, SPSS, MS Office

Statistical Skills: Regression, Hypothesis Testing, Monte Carlo Simulation, Data Visualization

Experience

Graduate Teaching Assistant, University of North Florida

- Evaluated quizzes and assignments for undergraduate statistics courses
- Supported students in understanding probability theory and regression analysis
- Maintained course records and instructional materials using Canvas

Projects

Monte Carlo Simulation for Poisson Regression

- Implemented Newton–Raphson estimation in R

- Compared custom implementation with GLM results

Undergraduate Research Project:

Title: Women's Decision-making Autonomy as a Mitigating Factor for Complete Antenatal Care Coverage:

Evidence from Bangladesh Demographic and Health Survey, 2017-18

- This study was done to determine the overall estimate of decision-making autonomy on Complete ANC coverage and associated factors in Bangladesh based on data from the Bangladesh Demographic and Health

Survey 2017-18 (BDHS)

- Conducted Chi-squared test to perform bivariate analysis. This analysis aimed to explore potential

relationships between the categorical predictor variables and a binary response variable.

- Fitted logistic regression models to assess the factors that have a significant effect on ANC.

- The study identified factors such as the education level of women, working status of women, exposure to

violence, etc. to be significant predictors of ANC.
